Assignment -2
Python Programming

Assignment Date	27 September 2022
Student Name	V. Dinesh
Student Roll Number	510119104005
Maximum Marks	2 Marks

Question-1:

Build a python code, Assume u get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

Program :

```
import random

import time

while True:

  tem=random.randint(10,100)

  hum=random.randint(10,100)

  if tem>=90:

    print(temp)

    print("High temperature is detected")

  elif tem==40:

    print("maximum threshold is reached")

  else:

    print("temperture is low")

  if hum>=60:

    print("high Humidity")

  else:

    print("low humidity")

    time.sleep(3)
```

din.py - E:/ibm/dines/din.py (3.10.7)

File   Edit   Format   Run   Options   Window   Help

```python
import random
import time
while True:
    tem=random.randint(10,100)
    hum=random.randint(10,100)

    if tem>=90:
        print(tem)
        print("High temperature is detected")
    elif tem==40:
        print("maximum threshold is reached")
    else:
        print("temperture is low")
    if hum>=60:
        print("high Humidity")
    else:
        print("low humidity")
        time.sleep(3)
```
